

30 DAYS OF CODE (Frontend)

DAY 11: Huddle landing page with alternating feature blocks

Description:

Your challenge is to build out the landing page from the designs provided in the starter code. Download the starter code and go through the README.md file. This will provide further details about the project. The style-guide.md file is where you'll find colors, fonts, etc. Keep your code as clean as possible. Be sure to use semantic HTML5 markup and reusable CSS classes.
